

For Immediate Release

26 January 2010

TeleEye Introduces Three New Members to Feature-packed RA Series Digital Video Recorder

TeleEye Group enhances the RA Series Digital Video Recorder by introducing three new models, RA304, RA308 and RA316. The new members are 4-, 8- and 16- channel full featured digital video recorders which incorporate with advanced proprietary SMAC compression technology and are equipped with built-in DVD writers for fast video extraction.

TeleEye RA is expanded with the addition of RX30 Series DVR

Excellent recording performance

TeleEye RA30 Series digital video recorder incorporates with SMAC video compression technology. It can provide up to 60% longer recording time than other MPEG-4 DVRs with no compromise on video quality. TeleEye RA30 Series features excellent DVD quality recording performance. It offers multiple recording modes and full control of recording rate and picture.

SMAC Video Coder

User friendly operation

TeleEye RA30 Series retains all the powerful features of its counterpart RA20 Series. Both offer triplex operation of simultaneous monitoring, recording and playback functions, and equipped with VGA video outputs which allows for the use of low cost flat screen displays.

Other highlighted features

- Resolution up to 720x576 / 720x480 pixels
- Recording up to 100/120 fps
- Schedule, alarm, motion detection
- Video extraction through USB flash drive or built-in DVD writer
- Fast & easy search for recorded video
- Built-in web server
- IR remote control
- Compatibility with popular telemetry protocols

- The End -
